DETAILED ACTION

1. This action is in response to Applicant's applications, filed on September 27, 2000 have been considered but are deemed moot because of Restrictions Request below.

Election/Restrictions

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-58, drawn to a method and system for computer server system for managing digital identify information connection with database including at least one user object for user, the user object having safe object in the database, which is database maintenance, classified in class 707, subclass 200.
- II. Claims 59-72, drawn to a system for user interface for user administration of a database, which is the browser that interfaces with database (Graphical User Interface), classified in class 345, subclass 650.
- III. Claims 73-89, system for proving the user with access to the profiles to allow the user to update information while denying access to other entities

and read-only access, which regulating accessing database to manipulate data in database, database accessing, classified in class 707, subclass 1.

3. The inventions are distinct, each from the other because of the following reasons: Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for computer server system for managing digital identify information connection with database including at least one user object for user, the user object having safe object in the database, which is database maintenance. Invention II can be used for user interface for user administration of a database, which is the browser that interfaces with database (Graphical User Interface). Invention III can be used for proving the user with access to the profiles to allow the user to update information while denying access to other entities and read-only access, which regulating accessing database to manipulate data in database, database accessing. See MPEP 806.05(d).

4. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and Group III each other, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
